

DICKENS OMONDI

SOFTWARE ENGINEER (FULLSTACK)

+254716957179 | omondidickens255@gmail.com | [github](#) | [linkedin](#)

Full-Stack Software Engineer with 3+ years of experience building scalable systems from concept through to production. Comfortable with current full-stack tools and focused on creating secure, fast-performing systems. Solid background in system design, API development, and database structure. Committed to writing clean, maintainable code that delivers clear, measurable value to the business.

AREAS OF EXPERTISE

Full-stack web development, designing scalable architectures, building clean REST APIs, modeling and optimizing databases (SQL & NoSQL), tuning performance, handling auth & access control, creating responsive front-ends, managing state effectively, using Git for version control, writing tests and debugging issues, setting up CI/CD pipelines, and delivering work in agile teams.

KEY ACHIEVEMENTS

- **Built and pitched an AI-powered sports solution** at EldoHub's AI in Sports hackathon — presented in front of the British High Commission, landed in the top entries, and earned strong recognition from the judges.
- **Designed and launched a Club Management System** for the University of Eastern Africa, Baraton — it centralized all records, cut out manual paperwork, and made day-to-day operations noticeably smoother for the admin team.

PROFESSIONAL EXPERIENCE

- Worked on a multi-tenant School Management System used by CBC schools across Kenya — handled tenant data isolation, role-based permissions, and built a clean scalable onboarding flow.
- Built an offline-first CBC Study Companion app so students can keep studying curriculum content even without internet access.
- Created and fine-tuned full-stack REST APIs using Node.js + Prisma — noticeably faster responses and secure user flows throughout the system.
- Delivered clean, responsive frontend interfaces with React, TypeScript, TailwindCSS and ShadCN — good state management and smooth experience across phones, tablets, and laptops.

EDUCATION

Bachelor of Science in Software Engineering - University of Eastern Africa, Baraton

- **Key coursework:** Data Structures & Algorithms, Database Systems, Software Engineering, Web Development, AI & Machine Learning, plus Business and Communication Skills.

ADDITIONAL SKILLS AND CERTIFICATIONS

- **Certifications:** Cisco Networking Academy Cybersecurity Certificate; AI in Sports Hackathon – Top Recognition (EldoHub)
- **Technical Skills:** React, TypeScript, Node.js, Express.js, PostgreSQL, Prisma, Docker, Postman, REST APIs, JWT auth, TailwindCSS, Git, agile workflows, state management, responsive UI design
- **Soft Skills:** Problem-solving, analytical thinking, teamwork across different roles, clear communication
